SUMMARY

I am a dedicated third-year Information Technology student actively seeking an IT-related internship to apply and expand my technical skills. With hands-on experience in coding, problem-solving, and team-based projects, I am passionate about using technology to create innovative and impactful solutions. I am eager to contribute to a professional IT environment where I can grow further, take on real-world challenges, and add value through my strong communication, collaboration, and critical thinking abilities.

- Figma │ Adobe Photoshop

UNIVERSITY PROJECTS

Online Helpdesk system for university students

https://github.com/AmaPrabuddi/HelpDesk-system---Shakespeare.git

HTML | CSS | JS | PHP
- Developed an Online Help Desk System for University Students using HTML, CSS, PHP, and JavaScript. The system simplifies academic support by allowing students to submit queries, track responses, and access resources easily.
- Enhanced user experience with a responsive design and interactive features, enabling effortless navigation, query tracking, and timely notifications.

Online Event Management System

https://github.com/AmaPrabuddi/Event-Management-System.git

Java | Servlet | JSP | Bootstrap
- Implemented an Online Event Management System featuring a user-friendly interface for event creation, registration, browsing, and management, using Java, Servlets, JSP, and Bootstrap technologies.
- The system simplifies event coordination by allowing users to easily organize, participate in, and manage events, while providing administrators with effective tools for oversight and control.

Reservation Management System

https://github.com/AmaPrabuddi/Reservation-Management-System.git

REACTJS | NODEJS | EXPRESSJS | MONGODB
- Developed a reservation management system tailored for streamlining bookings and resource allocation, enabling users to make, modify, and track reservations effortlessly.
- Utilized a combination of front-end and back-end technologies to deliver a seamless and interactive user experience, ensuring efficient management and user satisfaction.

Doctor Apoinment Managing Mobile Applicattion

https://github.com/AmaPrabuddi/Medi-Book.git

KOTLIN | FIREBASE
- Developed an intuitive doctor appointment management app using Kotlin to streamline healthcare scheduling.
- Implemented features such as appointment booking, doctor availability tracking, reminders for upcoming visits, and secure patient data management, ensuring a seamless and efficient experience for both patients and healthcare providers.
